About the Product:

BMC AMI Ops Automation for Batch ThruPut can help you automatically and intelligently optimize your batch processing to resolve hidden problems in manual batch processing. By balancing workload and improving batch throughput, it also delivers significant savings in software license fees and IBM Monthly Licensing Charges (MLC).

Recommended for: Operators

Training applicable to product versions: BMC Compuware ThruPut Manager 18.02 & BMC AMI Ops Automation for Batch ThruPut 22.04
