

A high-angle, top-down photograph of a woman with blonde hair tied in a bun, sitting at a wooden desk and typing on a silver laptop. She is wearing a light-colored button-down shirt, a silver watch, and several bracelets on her left wrist. The desk is cluttered with various items: a tablet, a smartphone, a pen, several stacks of papers and folders in yellow and teal, and a small white object. The background is a solid orange color with a white curved shape on the left side.

About the Product:

BMC AMI DevX Abend-AID is a failure resolution and fault management solution that enables developers to reduce the tedious and time-consuming task of manually cross-referencing pages of recorded application memory information with pages of application code to understand why an application failure occurred.

Recommended for: System and Application Programmers
