

A high-angle, top-down photograph of a woman with blonde hair tied in a bun, sitting at a wooden desk and typing on a silver laptop. She is wearing a light-colored button-down shirt, a silver watch, and a black and white striped wristband. Her hands have teal-colored nail polish. The desk is cluttered with various items: a tablet, a smartphone, a pen, several folders (yellow, teal, and blue), and some papers. The background is a solid orange color with a white curved shape on the left side.

ASP

Assisted Self Paced

About the Product:

BMC Compuware Abend-AID is a failure resolution and fault management solution that enables developers to reduce the tedious and time-consuming task of manually cross-referencing pages of recorded application memory information with pages of application code to understand why an application failure occurred.

Recommended for: System and Application Programmers

Training applicable to product versions: BMC Compuware Abend-AID 12.04, 16.05, and 17.02

ASP

Assisted Self Paced

About the Product:

Creating and maintaining multiple IMS development and test systems is hard. BMC Compuware COPE virtualizes IMS systems, so new development images of IMS are available nearly on demand, significantly reducing the cost and delay associated with creating new IMS subsystems.

Recommended for: Administrators

Training applicable to product versions: BMC Compuware COPE 19.x
